

# Gate 3S Nobel Weighing Systems

## Gateway

#### FEATURES

- Gate 3S significantly reduces overall system costs compared against equipping each weigh system with separate fieldbus interfaces
- Up to 16 units can be connected to GATE 3S
- Can be connected to most existing fieldbuses
- · Also indicates the status of the transmission

GATE 3S is a communication link between local network for transferring weight, force or servo data over external networks (fieldbuses) to PCs or PLCs.

GATE 3S can be connected to most existing fieldbuses. The PROFIBUS-DP, the most widely-used fieldbus, is kept in stock as standard, and other fieldbuses are available as options. Depending on the PLC and fieldbus used, up to 16 units can be connected to GATE 3S.

One of the special features of GATE 3S is its very fast transmission rates. It updates as an example five attached AST 3 units 50 times per second.

GATE 3S significantly reduces overall system costs compared against equipping each weigh system with separate fieldbus interfaces.

The GATE 3S display is used for set-up and service, and to monitor relevant data such as weights, set values and positions. It also indicates the status of the transmission.

#### **TECHNICAL DATA**

#### MEASUREMENT AND CONTROL PORT

Generation 3 weight/force measurement AST 3B/P/IS, TAD 3 Fast mapping

> 6 byte in: commands (zero, tare...) 6 byte out: weight, weight status Number of units: 1-16\* Total transfer time: 4ms/unit (115 kBaud)\*\*

#### **General mapping**

20 byte in: commands (zero, tare...), setpoints, write to any register 20 byte out: weight, status info, read from any register Number of units: 1-16\* Total transfer time: 6ms/unit (115 kBand)\*\*

#### Weight transmitter E-2-WEI Mapping

20 byte in: commands (zero, tare...), setpoints
20 byte out: weight, status info
Number of units: 1-16\*
Total transfer time: 60ms/unit (9.6 kbaud)\*\*
