

RBC-5TWM mount

- Stainless steel construction
- Integrated lift-off and overload protection
- Easy to install
- Simple service
- Sturdy construction
- Ideal for silos, tanks etc.

With its simple sturdy design, this stainless steel load cell mount is easy to install in existing and new weighing constructions. The mount can be mounted with or without load cell, which will shorten any unwanted production stops and at the same time any risk of damage to the load cell during mounting will be eliminated. The RBC5-TW is an integrated lift-off and overload protection system suitable for Silo, Hopper, and

Tank weighing. Movement in the construction due to temperature change, mechanical deflection or other unwanted forces will not influence the accuracy when using a RBC-5TWM mount. Built-in horizontal movement control. The mount tolerates controlled movements in all direction.
